SUMMARY

Full-stack developer with an engineering background and 2.5 years at Fujikura, where I gathered requirements and built internal tools for the quality team. Completed DevNest's Advanced Fullstack Bootcamp and built web applications with TypeScript, NestJS, Next.js, Prisma and PostgreSQL, including database design and role-based access control.

EDUCATION

King Mongkut's University of Technology Thonburi — **Bangkok, Thailand**
- B.Eng. in Control System and Instrumentation Engineering — **(Aug 2019 - Jun 2023)**

DevNest School - *Advanced Fullstack Bootcamp* — **Bangkok, Thailand**
- JavaScript, TypeScript, React, Next.js, Node.js, Express, NestJS, SQL & NoSQL, Prisma, Git, Linux — **(Apr 2026 - Sep 2026)**

EXPERIENCE

Fujikura Electronic Components (Thailand) Ltd. - *manufacturer of electronic components* — **Pathum Thani, Thailand**
Quality Engineer — **(Oct 2023 - Apr 2026)**
- Built and maintained VB.NET/WinForms tools that operators use for quality inspection on the production line, based on requirements gathered from operators and engineers.
- Developed a barcode inspection system that checks every scanned part (format, duplicates, check digits, earlier test results) and records PASS/FAIL in PostgreSQL for traceability.
- Connected the tools to shop-floor hardware: barcode scanners, a serial-port scale, label printers and an Arduino pass/fail signal.
- Used SQL (PostgreSQL) and Excel/CSV import tools to validate production and inspection data and find anomalies.

Plus IT Solution - *IT services and solutions provider* — **Bangkok, Thailand**
Technical Support Intern — **(Jun 2022 - Aug 2022)**
- Configured custom templates for the company's cloud application from customer requirements, tested the output and worked with developers to fix defects.
- Supported Looker Studio dashboards that turned customer data into product and competitor reports.

PROJECTS

Learnora - Online course marketplace (solo project) — **github.com/wipabhorn-s/learnora**
Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL, Opn Payments, Cloudinary
- Built a full marketplace end to end: instructors sell video courses, learners buy and study them, and admins handle refunds and 70% instructor payouts.
- Added checkout with cards, PromptPay and TrueMoney (test mode), and 100 MB video uploads sent straight from the browser to Cloudinary.

AumStocks - Stock management for retail shops (Team of 5) — **github.com/wipabhorn-s/aum-manage-stocks**
Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL, Stripe, LINE API
- Gathered the requirements and wrote the team's development guide (AGENTS.md).
- Built sign-in and accounts (JWT, 2FA, Google and LINE login), Stripe billing with plan upgrades, and the admin area with an audit log.

MATCHBACK - AI job-matching app (Hackathon, team of 4) — **github.com/Aum40/matchback**
Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL, Gemini API
- Built a two-sided "Tinder for jobs" for U-Hackathon 2026 (AI Track): a match happens only when a candidate and a recruiter both like each other.
- Designed the two-sided database and mutual-match API, built the Gemini-powered assistant with a rule-based fallback, and set up deployment.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, VB.NET, SQL, HTML, CSS
- **Frontend:** Next.js (App Router), React, Tailwind CSS, shadcn/ui, React Hook Form, Zod
- **Backend:** NestJS, Node.js, REST APIs, Prisma, .NET Framework (WinForms)
- **Database:** PostgreSQL, MongoDB
- **Auth & Payments:** JWT with refresh tokens, 2FA, Google & LINE OAuth, Stripe, Opn Payments
- **Tools & Cloud:** Git, GitHub, Vercel, Render, Cloudinary, Looker Studio
- **AI:** Claude Code, Codex, AGENTS.md for AI agents, Gemini API

CERTIFICATES

SQL (Intermediate) Certificate - *Online SQL Coding Test, HackerRank*
EF SET English Certification - *Scored 56/100 (CEFR B2 Upper Intermediate)*
